

DINOSTORY

THEATER

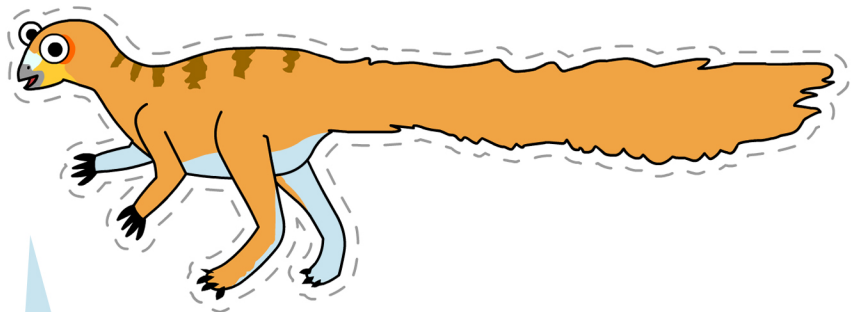

- Cut out the prehistoric animal cast and tape them to popsicle sticks or wooden skewers.
- Cut holes in the top or sides of a shoebox (or other cardboard box) large enough to fit your story elements.
- Cut out the scenery pieces and use them to transform your box into a stage. You can use scrap cardboard to create support stands, or tape or glue the pieces directly onto the box to hold them in place.
- Dig into your imagination to create a **dino-mite** show and explore how dinosaurs and other prehistoric animals lived!

Optional: Cut out the dino greetings and read them aloud to your audience.

RAAWR! I'M A TYRANNOSAURUS REX!

I lived about 66 million years ago in what is now North America. I ran on strong legs and my bite was quite mighty.

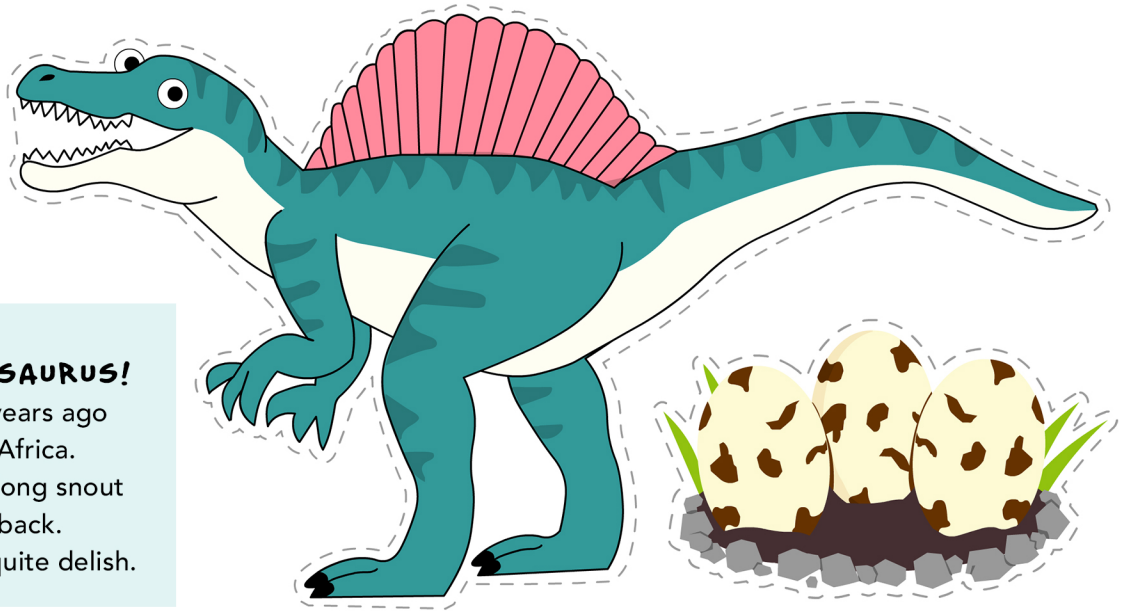

G'DAY! I'M A LEAELLYNASAURA!

I lived about 110 million years ago in what is now Australia near the South Pole. I munched on plants in dark cold lands.

HOLA! I'M AN ARGENTINOSAURUS!

I lived about 95 million years ago in what is now South America. I was one of the biggest dinosaurs, and I stretched my long neck high to reach tall plants in the sky.

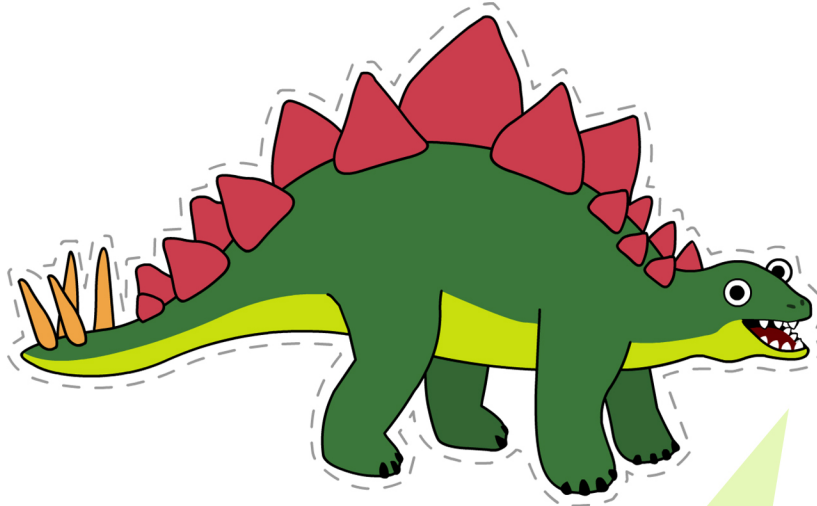

SWISH! I'M A SPINOSAURUS!

I lived about 95 million years ago in what is now North Africa. Without a doubt, I had a long snout and a tall sail on my back. I hunted fish, which were quite delish.

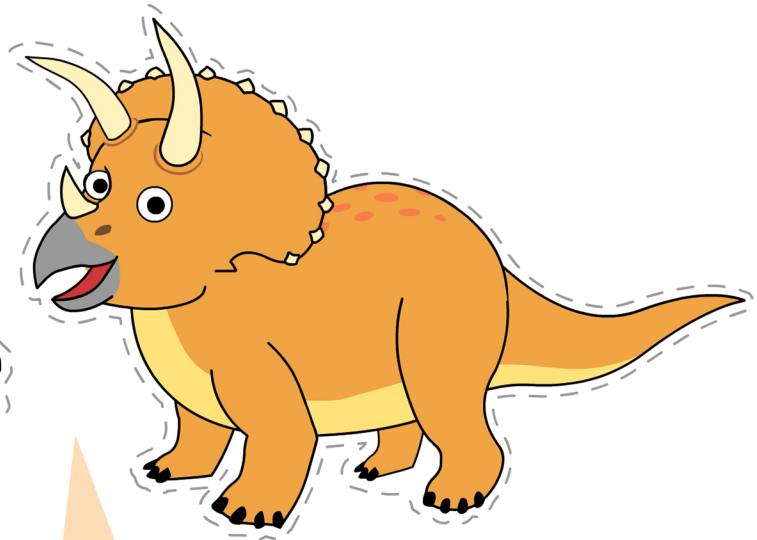

ZZZIP! I'M A VELOCIRAPTOR!

I lived about 75 million years ago in what is now Asia. I was small and fast, and I used my sharp claws to help me outlast my opponents.

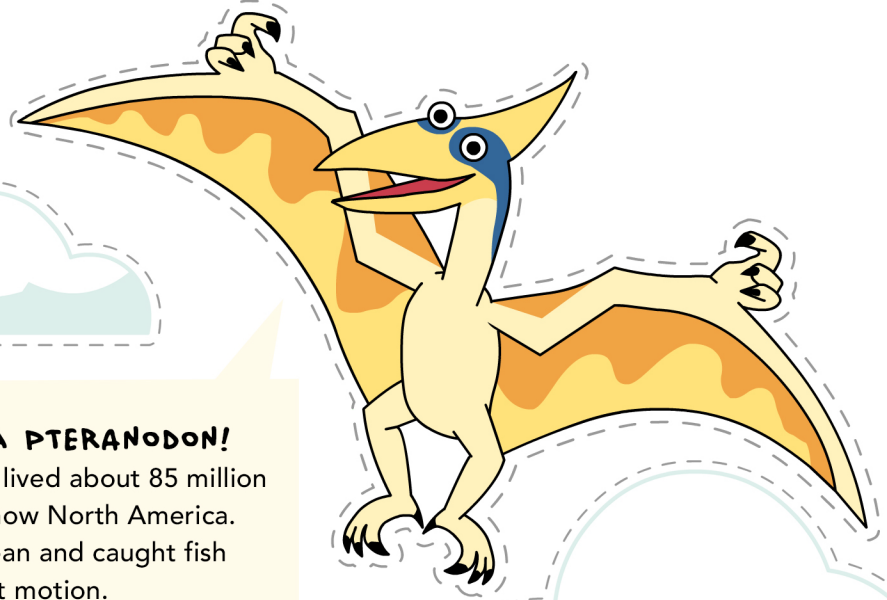

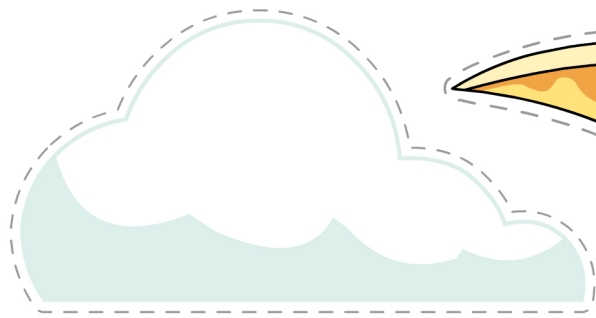

CLOMP CLOMP! I'M A STEGOSAURUS!

I lived about 150 million years ago in what is now North America. I had plates on my back and a spiky tail for attack.

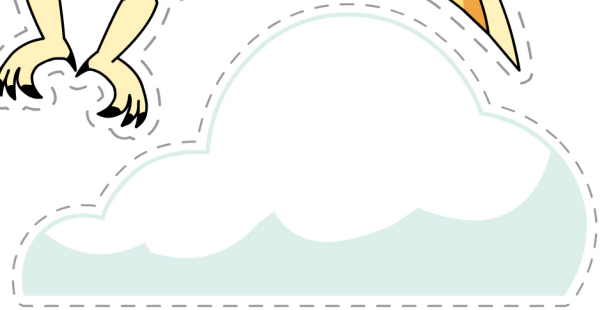

WATCH OUT! I'M A TRICERATOPS!

I lived about 66 million years ago in what is now North America. I had three horns and a large frill, and I used them to protect myself while I ate plants at will.

SWOOSH! I'M A PTERANODON!

I'm a **flying reptile** that lived about 85 million years ago in what is now North America. I glided over the ocean and caught fish in one swift motion.

CLANK! I'M AN ANKYLOSOSAURUS! I lived about 68 million years ago in what is North America today, with heavy armor and a clubbed tail to keep predators away. I ate plants that grow close to the ground, keeping me full, strong, and round.

SPLASH! I'M A MOSASAURUS!

I'm a **marine reptile** that lived about 80 million years ago. Curved teeth were one of my features, and I used them to hunt fish and other sea creatures.
